WHAT TO SAY AT THE COUNTER (ADVISOR)

1. Metal debris in the fuel system (pump, injectors)
Metal debris in the fuel system can clog a fuel injector or the fuel volume control valve and stall the engine. Owners report it at all mileages, so it is worth a look at every visit. A recall or warranty extension may pay for it: we check the VIN.
Ask: have you noticed stall while driving, or loss of power or limp mode?

Adjust after the inspection. The report is not a diagnosis or a guarantee, so say what the technician found, not what the report predicts.

NOTES FOR THE ADVISOR

Record findings here (OK / Watch / Fix and measurements); the advisor adjusts the quote before the handout is printed or sent.

Reference only. Follow Ford repair procedures and your shop's judgment.
